

# Getting Your Account Up and Running

Thank you being a Harvest Profit customer.

Harvest Profit is software for farmers who believe in managing their farm as a business. Our customers use Harvest Profit to gain better visibility into cost of production, grain marketing, and field-by-field profitability data. This visibility is a key to gaining the confidence necessary for making proactive and profitable farm business decisions.

We look forward to working with your operation.

You can always reach out to us via email at [support@harvestprofit.com](mailto:support@harvestprofit.com) or book a call at [HarvestProfit.com/call](https://HarvestProfit.com/call).

Thanks again for your business!

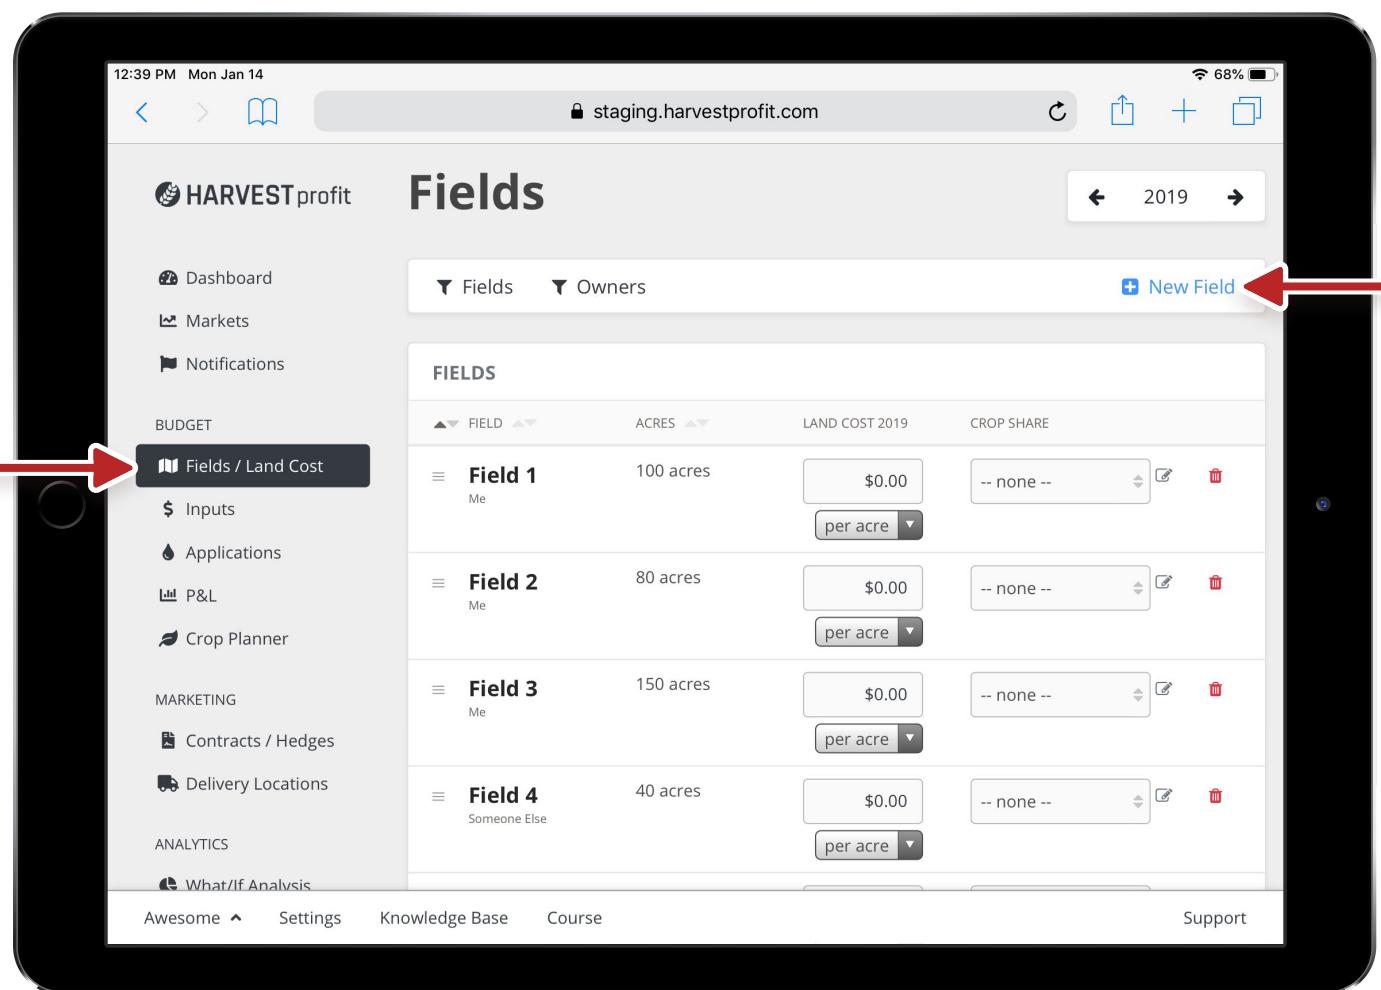

## Table of Contents

Fields.....	3
Settings.....	6
Crop Planner.....	9
Applications.....	11
Inputs.....	13

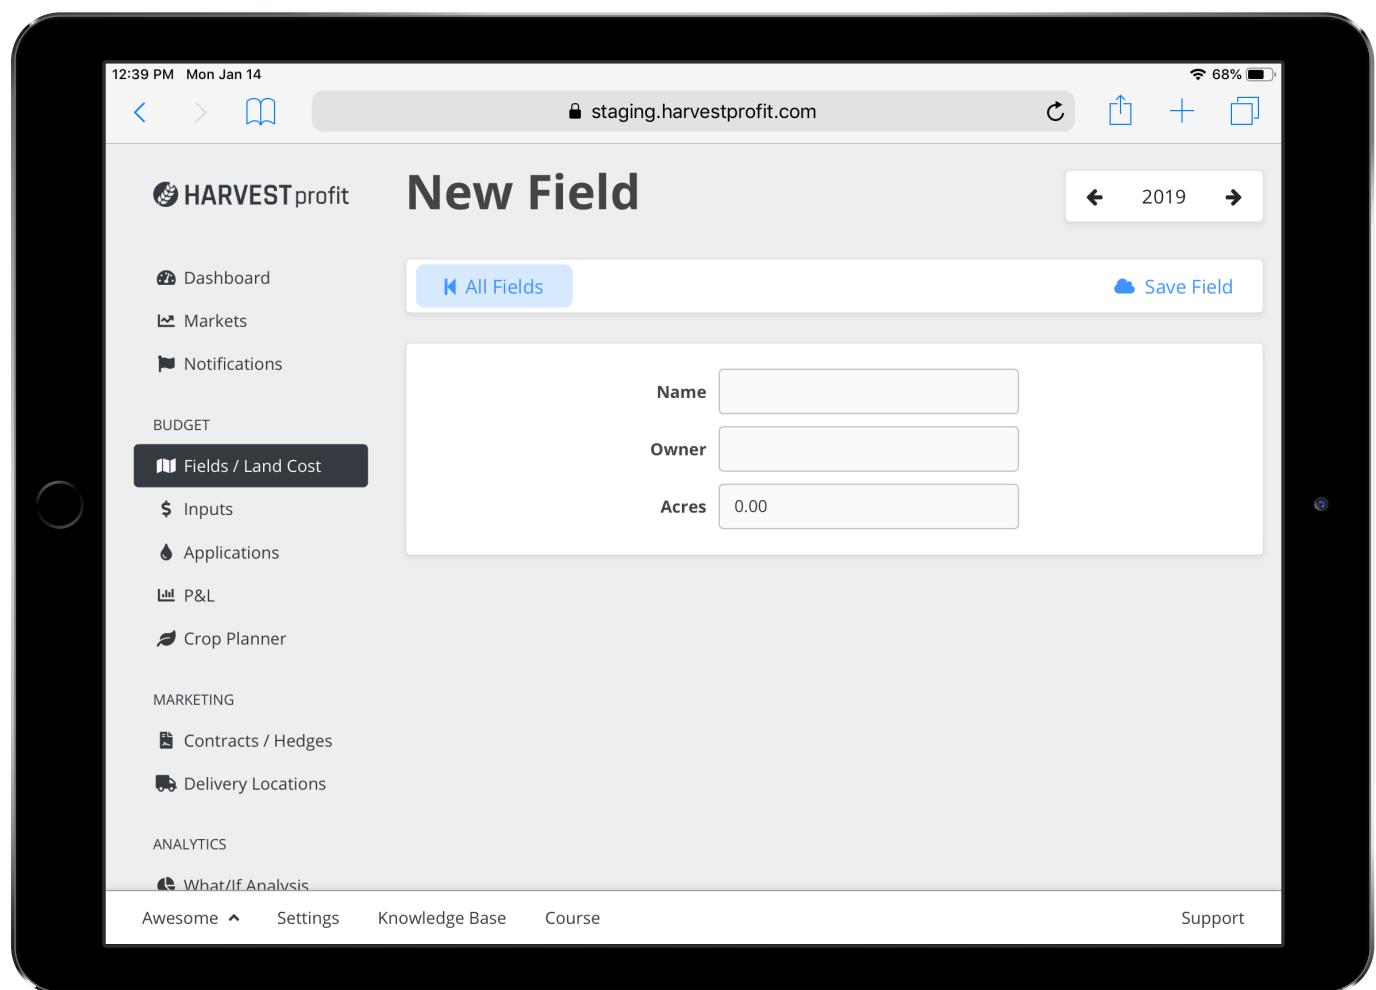

# Fields

## Step 1

Select the Fields page from the left column **A**, then add your fields by tapping the blue "New Field" button **B**

## Step 2

### NOTE

The acres number shown here is what we base your total cash rent on. If you change Planted Acres on the Crop Planner, it won't change your Field Acres or your cash rent/land cost.

Add your field details here.

You can also come back and edit these details at anytime. You can also "archive" the fields which removes them from the current year you are on and future years, but not prior years.

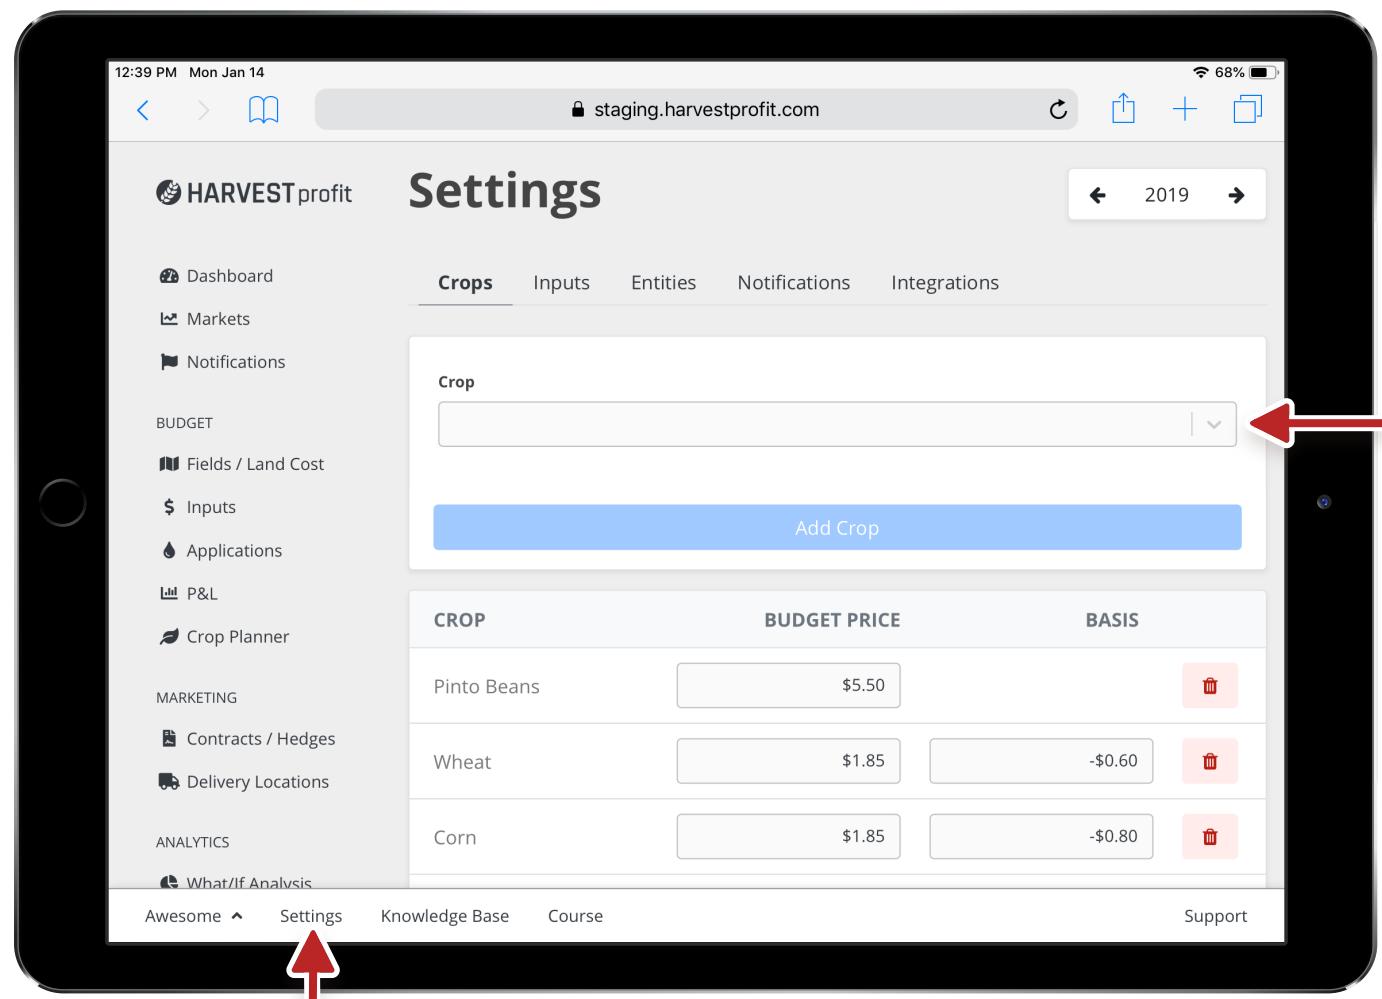

SETTINGS ↴

# Settings

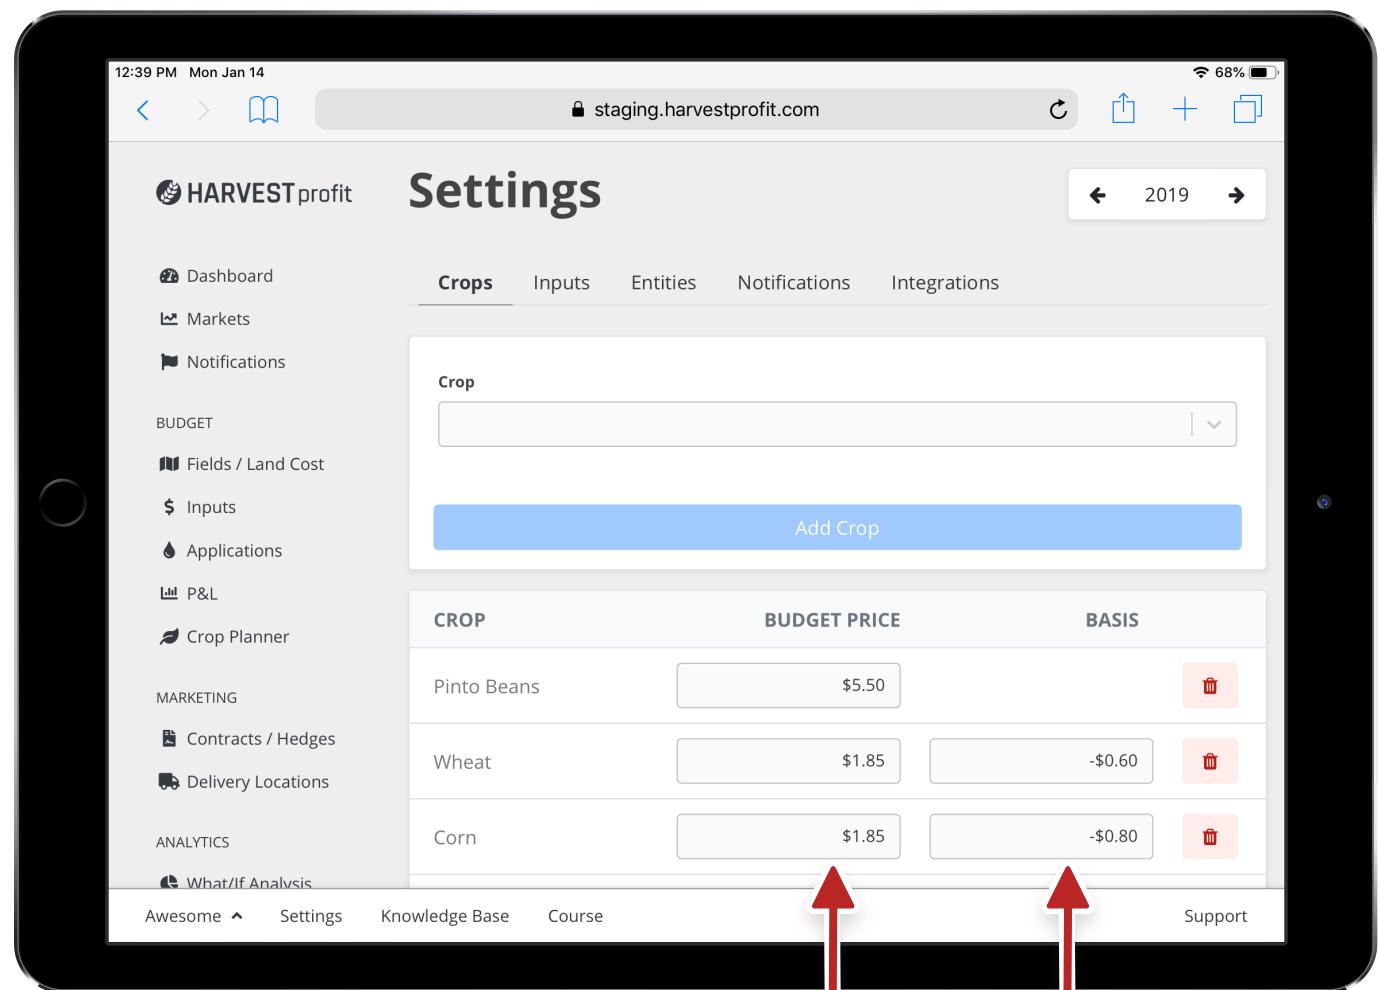

02 / 05

## Step 1

On the Settings page **A**, add any of your crops you'd like to track **B**.

## Step 2

Add your basis settings for your crops here **A**. You can also add your budget price for any other crops **B**.

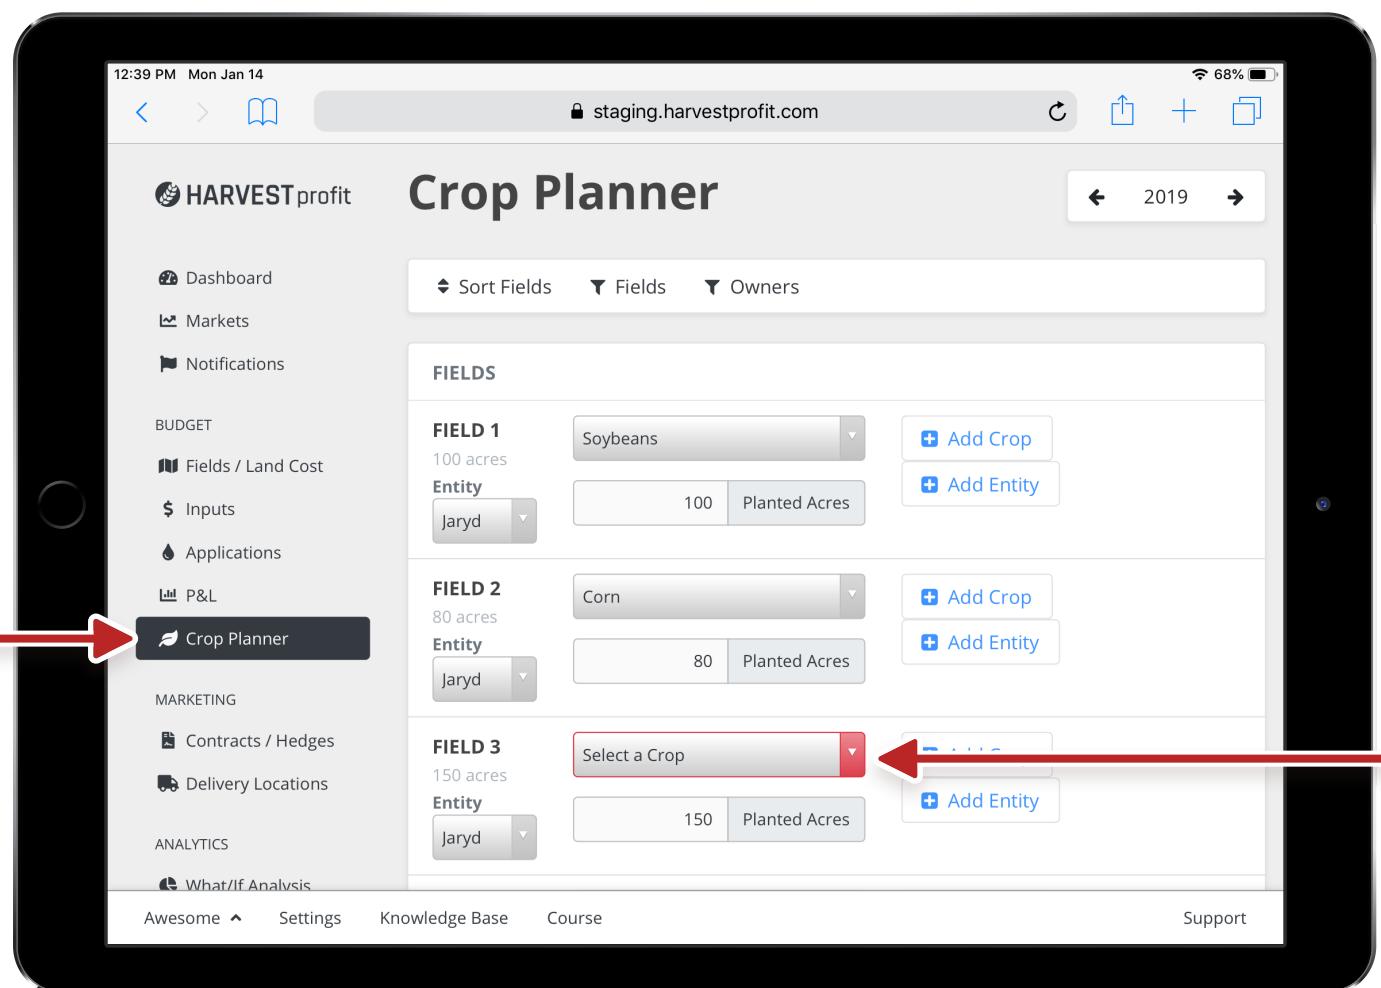

**CROP PLANNER ↗**

# Crop Planner

03 / 05

## Step 1

### NOTE

The math won't work correctly without crops and yields (at least estimates) set for each field.

Go to the Crop Planner page **A**, for whatever year you're working on, and assign a crop to each field **B**.

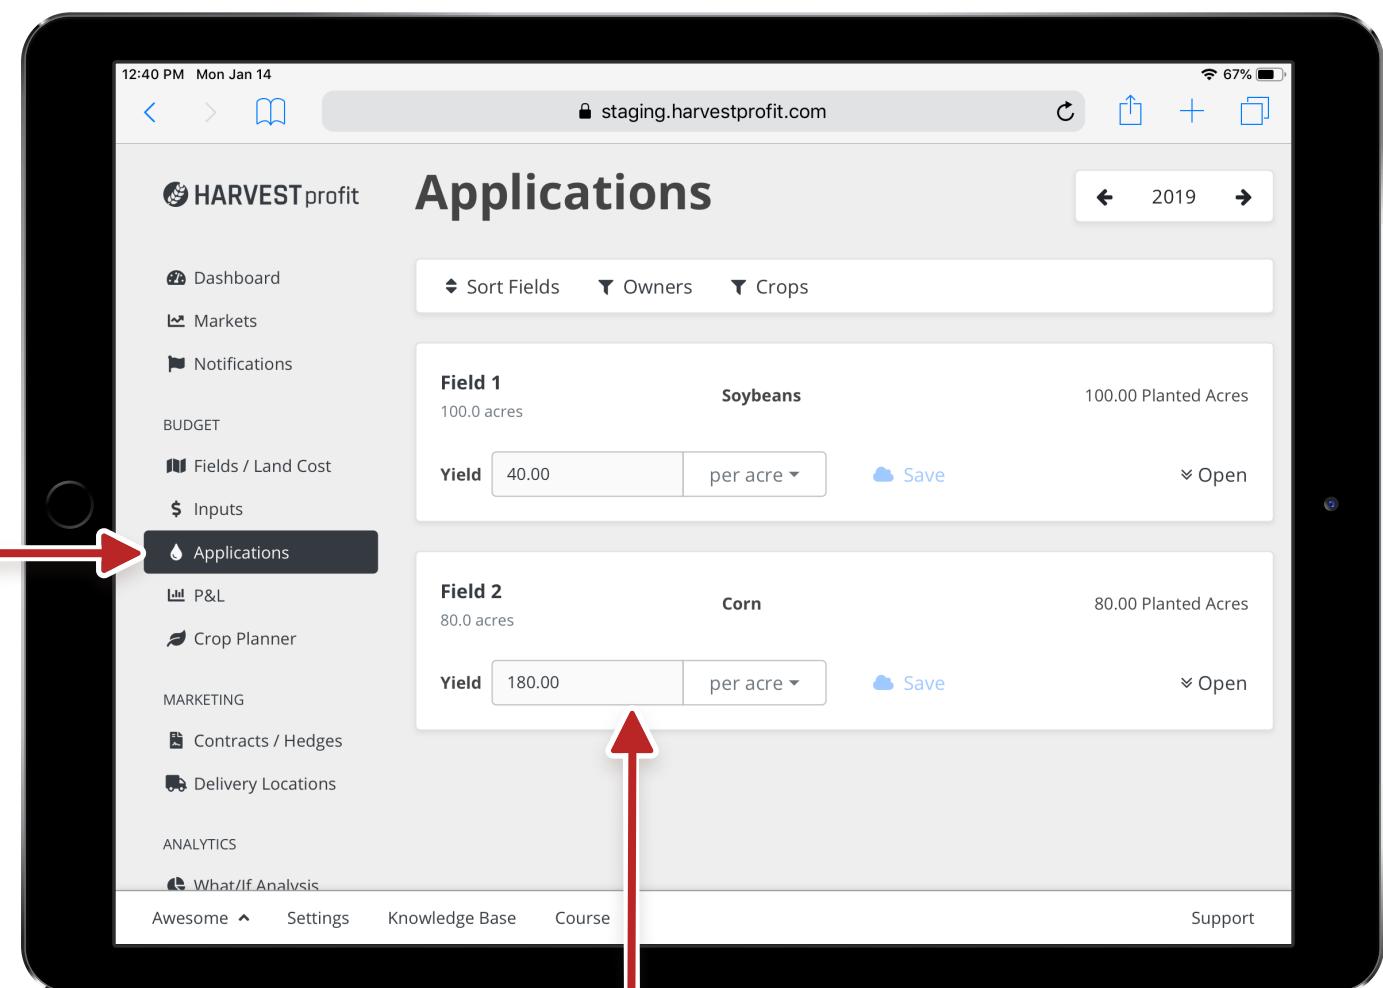

APPLICATIONS ↴

# Applications

04 / 05

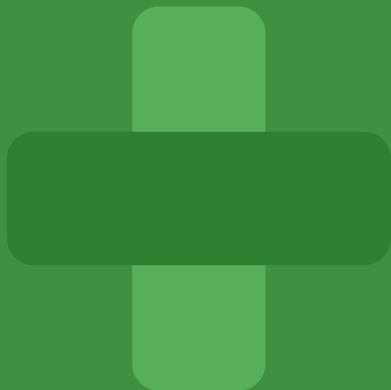

## Step 1

### NOTE

The math won't work correctly without crops and yields (at least estimates) set for each field.

Go to the Applications page **A**, for whatever year you're working on, and assign a yield to each field **B**.

INPUTS ↗

# Inputs

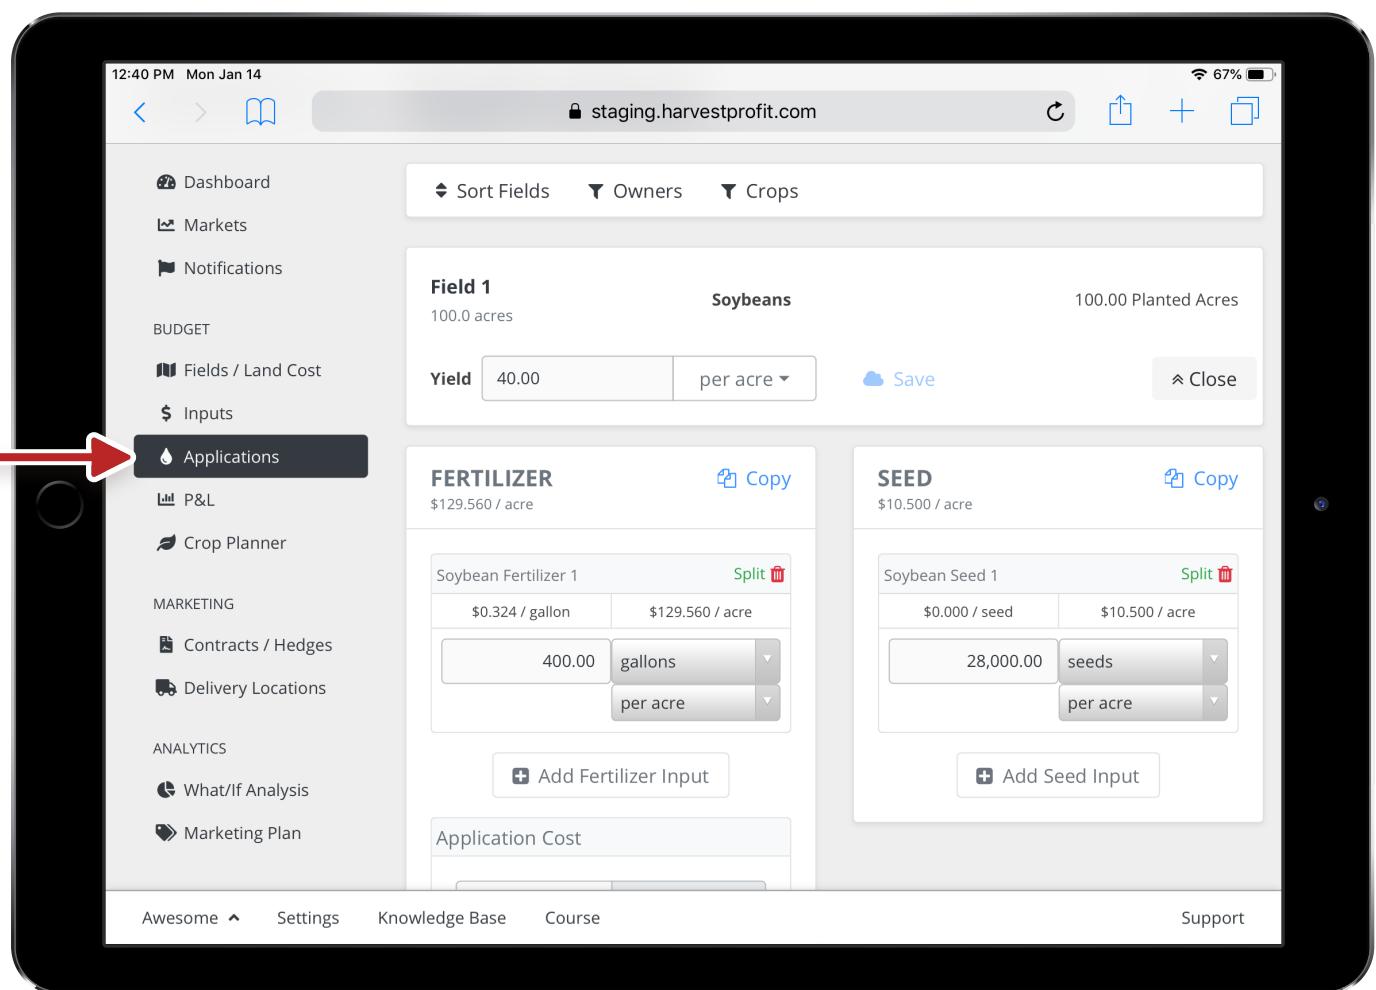

05 / 05

\$

The screenshot shows the HARVESTprofit mobile application interface. At the top, there's a header bar with the date "12:40 PM Mon Jan 14", a lock icon, the URL "staging.harvestprofit.com", and various navigation icons. Below the header is the app's logo and the word "Inputs". To the right of the title is a date selector showing "2019" with arrows to change it. The main content area has tabs for "Inputs", "Input Totals", "Input Totals By Field", and "Inputs Copy", with "Inputs" being the active tab. There's also an "Export" button and a "+ Categories" button. The central part of the screen displays a table titled "FERTILIZER" with columns for CROPS, DESCRIPTION, COST, UNITS, LIQUID, and DENSITY. The table lists several items: Corn Fertilizer 1 (\$130.00 per ton), Corn Fertilizer 2 (\$30.00 per ton), Wheat Fertilizer 1 (\$100.00 per ton), Soybean Fertilize (\$82.00 per ton), Soybean Fertilize (\$19.00 per ton), and Pinto Bean Fertilii (\$25.00 per ton). At the bottom of the table is a blue "+ Add Fertilizer" button. On the left side of the screen is a vertical sidebar with a red arrow labeled "A" pointing to the "Inputs" button. The sidebar contains several menu items grouped under categories: BUDGET (Fields / Land Cost, Applications, P&L, Crop Planner), MARKETING (Contracts / Hedges, Delivery Locations), and ANALYTICS (What/If Analysis, Marketing Plan). At the bottom of the sidebar are links for "Awesome", "Settings", "Knowledge Base", "Course", and "Support".

## Step 1

Select Inputs from the left column **A**, then add your inputs/expenses

## Step 2

Then go to the Applications page **A** and apply your per field rates.
